

GAGAN POOJARI

Software Engineering Intern ([Portfolio website](#))

+91-6361708117 | Bengaluru, Karnataka
gagancgp@gmail.com
[linkedin.com/in/gaganpoojari](https://www.linkedin.com/in/gaganpoojari)
github.com/Gagan-poojari/

TECHNICAL SKILLS

Languages: Python, JavaScript, C, Java, C++, YAML

Web development: React.js, Next.js, Node.js (Express.js), Tailwind CSS, Framer motion

Machine Learning & AI: TensorFlow, OpenAI Whisper, YOLOv5, OpenCV, NumPy, Pandas

DevOps & MLOps: Docker, Kubernetes, MLflow, DVC, GitHub Actions, Prometheus, Grafana

Databases & Cloud: MongoDB, SQL, JWT, Bcrypt.js, AWS, Vercel

PROFESSIONAL EXPERIENCE

FREELANCE SOFTWARE DEVELOPER | VARIOUS CLIENTS | 2025 -- PRESENT

RUVA - E-Commerce Platform ([Live](#)):

Mar 2026 -- May 2026

- Built full-stack e-commerce with product catalog, cart, wishlist, and order history; implemented JWT auth, Google OAuth, and Razorpay payments with server-side verification.
- Created admin dashboard with Cloudinary image uploads and Gemini AI product description generation; secured APIs with rate limiting, CORS, and request validation.

HOLMAC Interiors ([Live](#)):

Dec 2025 -- Jan 2026

- Built multi-page marketing site with Cloudinary image/video galleries, scroll-triggered animations, EmailJS lead capture, EMI calculator, and Google Analytics conversion tracking.
- Implemented WhatsApp click-to-chat, Google Reviews carousel, SEO metadata, and a network-aware branded entrance video for optimized user experience.

Namma Benaka - Loan Management Platform ([Live](#)):

Apr 2025 -- Nov 2025

- Developed loan management system with borrower onboarding, repayment tracking, and Admin/Manager portals using role-based JWT authorization and bcrypt-secured credentials.
- Implemented repayment schedules, automated late-fee cron jobs, and Recharts dashboards for portfolio overview, overdue loans, and audit logs.

Fortune Institute - Course Enrollment Website ([Live](#)):

May 2025 -- Jul 2025

- Built Next.js App Router site with dynamic course pages, query-parameter-based registration, and EmailJS-integrated enrollment forms.
- Added Swiper carousels (coverflow hero, faculty, testimonials), Framer Motion scroll animations, and optimized images via next/image.

TECHNICAL PROJECTS

Pleeb - NLP Audio Processing | [GitHub](#)

- Developed an NLP web app using OpenAI Whisper and Streamlit, achieving 92% accuracy in language processing.
- Programmed automatic explicit-audio replacement and keyword-based transcript editing using ffmpeg and pydub.

MLOps Pipeline & CI/CD Automation | [GitHub](#)

- Built an end-to-end NLP sentiment classification pipeline (IMDB) with DVC-managed workflows and a Flask UI for real-time predictions.
- Managed experiment tracking and model promotion using MLflow + DagsHub, automated CI/CD with GitHub Actions, and monitored inference metrics (latency, request volume, prediction distribution) using Prometheus.

Sri Udupi Food Hub | [Github](#): Built a restaurant marketing platform with Cloudinary integration for optimized image delivery, projected to reduce marketing costs by 40%.

Neural Network from Scratch | [GitHub](#): Built a handwritten digit classification model from scratch using only NumPy, implementing backpropagation and gradient descent without high-level ML libraries, achieving 90% accuracy.

COURSES & CERTIFICATIONS

Machine Learning Specialization - Stanford University & DeepLearning.AI (Coursera) [Verify](#)

- Supervised Machine Learning: Regression and Classification [Verify](#)
- Advanced Learning Algorithms [Verify](#)
- Unsupervised Learning, Recommenders, Reinforcement Learning [Verify](#)

EDUCATION

B.Tech in Artificial Intelligence and Machine learning (Semester 6), UVCE Bangalore - CGPA: **8.76 / 10**

2nd PU (PCMCs), Karnataka board (2023) - Percentage: **94.8 %**

Class 10 (CBSE) (2021) - Percentage: **88.4%**
