Professional Summary

Results-driven Software Engineer with strong expertise in Full-Stack Development (MERN) and Artificial Intelligence. Proven track record of delivering 5+ live production projects, ranging from scalable fintech platforms to end-to-end MLOps pipelines. Adept at leveraging modern frameworks like Next.js, Node.js, Python, and PyTorch to architect and deploy intelligent, high-performance web applications.

Education

University Visvesvaraya College of Engineering

B.Tech in Artificial Intelligence and Machine Learning (CGPA: 8.89)

2023 – 2027

Bengaluru

Technical Skills

Languages: Python, JavaScript, TypeScript, HTML, CSS, SQL, C++, Java, YAML

Machine Learning & AI: PyTorch, Azure AI Foundry (Models & SDK), AI Agents, NumPy, MLflow, DVC, Grafana

Web Development: Next.js, React.js, Express.js, Tailwind CSS, Framer Motion, Docker, MongoDB, Vercel, Git/GitHub, REST APIs, Postman, Cloudinary

Experience

Freelance Full-Stack Developer

January 2025 – Present

Self-Employed

• **RUVA – E-Commerce Platform** (Mar 2026 – May 2026) | [Live Site](#)

Engineered a full-stack e-commerce platform with secure Razorpay payment flows, JWT/OAuth, and robust RESTful APIs configured with rate-limiting and CORS. Integrated Gemini AI to reduce catalog curation time by 70%, and optimized the media pipeline with Cloudinary and Next.js image components to slash CDN bandwidth utilization by 60%+.

• **Namma Benaka – Loan Management Platform** (Apr 2025 – Nov 2025) | [Live Site](#)

Architected a full-stack loan management platform featuring secure, role-based Admin/Manager portals and interactive financial dashboards for real-time portfolio tracking. Engineered automated background cron jobs to process daily late-fee calculations and generate system activity logs, eliminating manual data entry and reducing operational overhead by 40%.

• **Client Projects**

Delivered scalable, conversion-focused web solutions for multiple clients, including [Trident Academy](#) (redesigned navigation and mega-menus for an EdTech ERP institute), [HOLMAC Interiors](#) (responsive marketing platform with Cloudinary video galleries and WhatsApp integration), and [Fortune Institute](#) (Next.js App Router course enrollment site with query-parameter-based registration and EmailJS forms).

Technical Projects

Pleeb – NLP Audio Processing | *Next.js, FastAPI, PostgreSQL, OpenAI Whisper*

[GitHub](#)

- Architected a full-stack NLP SaaS using Next.js, FastAPI, and PostgreSQL, leveraging OpenAI Whisper for highly accurate word-level transcription.
- Engineered an automated media pipeline via PyDub and MoviePy to dynamically censor explicit content, reducing manual video editing time by 90%.

LedgerFlow – AP Automation | *Node.js, Express, OCR, Automation*

[GitHub](#)

- Architected an automated accounts payable platform featuring a dual-stage hybrid OCR invoice-extraction pipeline.
- Developed a custom mod-36 validation engine and a multi-tier serverless approval workflow.

MLOps Pipeline & CI/CD Automation | *PyTorch, MLflow, DVC, Grafana*

[GitHub](#)

- Architected an end-to-end NLP sentiment classification pipeline integrating DVC workflows and MLflow experiment tracking.
- Deployed automated GitHub Actions CI/CD pipelines alongside live Prometheus and Grafana inference monitoring.

Certifications

Azure AI Apps and Agents Developer Associate | *Microsoft*

[Verify](#)

- Azure AI Foundry, Multi-Agent Systems, Azure AI Speech, Azure AI Language, Generative AI Applications.

Machine Learning Specialization | *Stanford University & DeepLearning.AI*

[Verify](#)

- Supervised Learning, Advanced Learning Algorithms, Unsupervised Learning, Recommender Systems, Reinforcement Learning.

Microsoft AI Skills Fest 2026 | *Microsoft*

[Verify](#)
