Summary

Full-stack (MERN) and AI/ML engineer who ships real products: 6 live client apps, from e-commerce to loan management, plus an end-to-end MLOps pipeline. Owns projects from design to deployment in Next.js, Node.js, FastAPI and PostgreSQL, with a sharp eye for clean, fast interfaces. Freelancing since January 2025; seeking a product-focused engineering role.

Education

University Visvesvaraya College of Engineering **2023 – 2027**
B.Tech in Artificial Intelligence and Machine Learning (CGPA: 8.89) *Bengaluru*

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C++, Java, HTML/CSS
Full-Stack: Next.js, React.js, Node.js, Express.js, MERN, FastAPI, Tailwind CSS, REST APIs, JWT/OAuth
AI/ML: PyTorch, NLP, OCR, OpenAI Whisper, Gemini API, Azure AI Foundry, AI Agents, NumPy
MLOps & DevOps: Docker, GitHub Actions (CI/CD), MLflow, DVC, Prometheus, Grafana, Vercel
Databases & Tools: PostgreSQL, MongoDB, Cloudinary, Razorpay, Postman, Git/GitHub
Core CS: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, OOP

Experience

Freelance Full-Stack Developer **January 2025 – Present**
Self-Employed *Bengaluru*

RUVA – E-Commerce Platform | *Mar 2026 – May 2026* **Live Site**
- Engineered a full-stack store with Razorpay payments, JWT/OAuth auth, and rate-limited, CORS-secured APIs.
- Integrated Gemini AI for 70% faster catalog curation; optimized Cloudinary images, reducing CDN bandwidth 60%+.

Namma Benaka – Loan Management Platform | *Apr 2025 – Nov 2025* **Live Site**
- Developed role-based Admin/Manager portals with real-time financial dashboards for portfolio tracking.
- Automated daily late-fee calculation and activity logging via cron jobs, cutting operational overhead by 40%.

Bella Vista Homestay – Booking Website | *2026* **Live Site**
- Designed a booking site for a coffee-estate homestay with an interactive availability calendar, guest selector, and weekday/weekend pricing logic across three stay types.
- Launched a travel-guide blog and newsletter signup to drive organic discovery.

Other Client Sites | *Next.js, Tailwind CSS, Cloudinary*
- Trident Academy: Redesigned navigation and mega-menus for an EdTech ERP institute.
- HOLMAC Interiors: Delivered a responsive marketing site with Cloudinary video galleries and WhatsApp integration.
- Fortune Institute: Implemented an App Router enrollment site with query-parameter registration and EmailJS forms.

Technical Projects

Pleeb – NLP Audio Processing | *Next.js, FastAPI, PostgreSQL, OpenAI Whisper* **GitHub**
- Created a full-stack NLP SaaS with word-level Whisper transcription and a PyDub/MoviePy pipeline that auto-censors explicit audio, cutting manual editing time by 90%.

LedgerFlow – AP Automation | *Node.js, Express, OCR, Serverless* **GitHub**
- Architected an accounts-payable platform with hybrid OCR invoice extraction, a custom mod-36 validation engine, and a serverless approval workflow.

MLOps Pipeline & CI/CD Automation | *PyTorch, MLflow, DVC, Grafana* **GitHub**
- Established an NLP sentiment pipeline with DVC, MLflow, GitHub Actions CI/CD, and Grafana monitoring.

Certifications

Azure AI Apps and Agents Developer Associate | *Microsoft* **Verify**
- Azure AI Foundry, Multi-Agent Systems, Azure AI Speech and Language, Generative AI Applications.

Machine Learning Specialization | *Stanford University & DeepLearning.AI* **Verify**
- Supervised and Unsupervised Learning, Recommender Systems, Reinforcement Learning.

Microsoft AI Skills Fest 2026 | *Microsoft* **Verify**
